

Auction & Remarketing Key Service

We make keys for units that arrive without them, at your yard, in volume, before sale day. All keys lost, push-to-start fobs and dealer-software vehicles, nearly every make, 1998 through 2026. Based in Oklahoma City, statewide for remarketing accounts.

Keys that work after the sale, not just across the block

Every key we make is cut to the vehicle's code and checked for a clean, smooth turn before we move to the next unit. The buyer drives away with a key, not a key that worked once.

WHAT WE HANDLE

A unit arrives with no keys. We originate a key at the vehicle and program it, ready to run through the lane.

Push-to-start and newer units. Proximity fobs programmed on site, including manufacturer-software vehicles.

A run before sale day. Send the list. We work through it at your yard in one visit.

Volume pricing. The more units on a run, the better the per-unit rate. We quote the run as a whole.

Mixed inventory. Older trucks, late-model SUVs, sedans and vans on the same run.

HOW IT WORKS

Standing runs or on-call. A regular day each week for incoming inventory, or call when a batch lands.

One contact, one invoice. Itemized against your stock or lot numbers, per run or per month, on your payment terms.

Vendor onboarding. W-9, certificate of insurance and license on request. We can be added to your vendor portal.

Hours. Monday to Friday, 9 to 5, scheduled around your sale days.

Statewide. In the Oklahoma City metro daily. For volume work we travel anywhere in Oklahoma.
