

Fleet Key Service for Oklahoma

Lost, broken or missing keys replaced, and duplicate keys cut and programmed in bulk, at your lot anywhere in Oklahoma, on a schedule that fits your operation. Nearly every make, 1998 through 2026, including push-to-start and dealer-software vehicles.

No trips to the dealership

Most fleet keys don't need the dealer. We come to your lot, make and program the key there, and the vehicle goes back into service the same visit. No driver tied up shuttling a vehicle to a dealership and back.

WHAT WE HANDLE

A driver lost the only key. We make a new key at the vehicle, wherever it's parked, with no tow. Push-to-start fobs included.

A key broke, wore out or stopped working. We replace it and program it on site.

A spare for every unit. Duplicates cut and programmed in bulk at your lot, one visit, so a lost key never sidelines a vehicle.

New units arriving with one key. We add the second key before the vehicle goes into service.

Mixed fleet. Pickups, vans, sedans and SUVs, across makes and model years, on the same visit.

HOW IT WORKS

Standing or on-call. A regular visit for duplicates and new-unit keys, or call when a key goes missing.

One contact, one invoice. Itemized per visit or per month, on your company's payment terms.

Vendor onboarding. W-9, certificate of insurance and license on request. We can be added to your vendor portal.

Hours. Monday to Friday, 9 to 5, around your lot's schedule.

Statewide. Based in Oklahoma City, in the metro daily. For bulk fleet work we travel anywhere in Oklahoma.
